EDUCATION

University of Lucknow

Lucknow, India

Bachelor of Technology – Computer Science & Engineering (Artificial Intelligence)

2023 – 2027

- Relevant Coursework: Data Structures & Algorithms, System Design, Machine Learning, Natural Language Processing, Database Management Systems, Object-Oriented Programming

TECHNICAL SKILLS

Languages: Python, Java, C, SQL

AI/ML & Data Science: Large Language Models (LLMs), Generative AI, Retrieval-Augmented Generation (RAG), Natural Language Processing (NLP), Prompt Engineering, Data Science

Web Development: HTML, CSS, Flask (Python)

Core Concepts: Data Structures & Algorithms, System Design, REST APIs, PDF Parsing, ATS Optimization

Developer Tools: Git, GitHub, VS Code, IntelliJ IDEA, PyCharm

PROJECTS

ExamJugaad – AI-Powered Study Assistant | *Python, Flask, RAG, LLMs, HTML, CSS*

2024 – 2025

- Architected and deployed an end-to-end AI academic platform supporting Q&A, document summarization, and intelligent learning, serving students with context-aware responses
- Implemented Retrieval-Augmented Generation (RAG) pipeline integrated with LLMs, achieving accurate and grounded responses by dynamically pulling relevant context from uploaded documents
- Built RESTful backend using Python (Flask) and designed a responsive frontend (HTML, CSS), enabling seamless document uploads and real-time query-based learning interactions

AI Resume Analyzer | *Python, NLP, LLMs, PDF Parsing, ATS Optimization*

2026

- Developed an AI-powered resume evaluation system that scores resumes against job descriptions using NLP and LLM-based semantic analysis, delivering a quantified match percentage
- Integrated PDF parsing and automated skill-gap analysis to surface missing keywords and competencies, improving ATS compatibility and recruiter visibility for end users
- Implemented actionable recommendation engine providing structured, role-specific feedback to help candidates align resumes with target job requirements, increasing interview callback potential

AI Interview Assistant | *Python, LLMs, Prompt Engineering, NLP*

2026

- Built a real-time AI mock interview system leveraging prompt engineering to dynamically generate role-specific technical and behavioral interview questions tailored to candidate profiles
- Designed an automated answer evaluation and feedback engine using LLMs to assess response quality, identify gaps, and provide structured improvement suggestions for interview preparation

EXPERIENCE

Generative AI Intern

June 2025 – August 2025

ExamJugaad

Remote

- Developed and maintained the ExamJugaad AI Study Assistant from concept to deployment, integrating LLMs, RAG pipelines, and a full-stack Flask application
- Gained hands-on experience with production-level LLM APIs, prompt engineering, and modern AI tools in a real-world product environment
- Collaborated on end-to-end AI application development covering data ingestion, model integration, backend API design, and frontend delivery

CERTIFICATIONS & TRAINING

Summer Training – Generative AI | IIT Kanpur (E&ICT Academy)

Machine Learning using Python | Simplilearn SkillUp

What is Generative AI | LinkedIn Learning

AI for Beginners | HP Life
